

LABORATORY ANALYST, QUADRANT BIOSCIENCES

COMPANY

This is a fantastic opportunity to join a rapidly growing biotech company. Quadrant Biosciences works with top academic institutions, medical researchers and engineers to translate breakthrough findings into thoughtfully developed, scientifically sound applications. Our technology includes functional assessments and epigenetic biomarkers for neurological conditions such as concussion, autism spectrum disorder, and Parkinson's disease. Quadrant Biosciences was recently highlighted on CNN, NPR, Bloomberg, and Huffington Post for its groundbreaking work.

JOB SCOPE

The Laboratory Analyst will perform techniques and tasks to serve a high throughput testing laboratory.

Responsibilities include but not limited to:

- Performing various lab techniques with a main focus on qPCR testing to assist with output of samples.
- Complete lab tasks such as waste removal, inventory counts and miscellaneous tasks to keep clean and flowing efficiently.
- Documentation of all lab techniques performed in a detailed, accurate and neat manner.
- Ability to work first shift Monday through Friday while having flexibility to potentially work night shift and/or weekends.
- Work closely with other team members in a cooperative fashion to ensure timely sample output.

KNOWLEDGE, SKILLS AND ABILITIES:

- Lab experience which includes the ability to pipette small volumes
- Knowledge of Good Laboratory Practices (GLP) and Good Documentation Practices (GDP)
- Ability to have good attention to detail.
- Great team player who is collaborative and positive.
- Ability to clearly communicate.
- Demonstrates ability to effectively manage multiple tasks utilizing organization and prioritization skills, self-motivated.
- Strong interpersonal, written/oral communication and problem solving skills.

QUALIFICATIONS

- Bachelor's Degree or higher in preferably a scientific discipline (Chemistry, Biology) or equivalent.
